Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claims 12, 14 and 15 are objected to because of the following informalities:

Claim 12: this claim is unclear because it is written with language that refers back to elements making it appear to be a dependent claim. However, it is written in independent form. Therefore, it has been treated as an independent claim.

Claims 14 and 15: there is no antecedent basis for "the permanent magnetic body" in these claims.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 and 10-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kousek et al..

Art Unit: 2859

4. Kousek et al. discloses the invention as claimed where: **11** is a semiconductor laser; **13** is an optical deflector which is two plates; and **14**, **15**, and **17** are optical expanders in the claimed locations.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6-9 and 13-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kousek et al. in view of Pu.

7. Kousek et al. discloses the invention substantially as claimed. However, Kousek et al. does not disclose all the specific optical deflectors or the specific plumb members as claimed. Pu discloses the various optical deflectors as claimed for the purpose of alternatively deflecting laser light in perpendicular planes. Pu also discloses a plumb **72** as claimed, which inherently can be copper or steel. The Pu device also has magnetic means associated with the plumb. Therefore, it would have been obvious at the time the invention was made to use the features of Pu in combination with the device of Kousek et al. for the purpose of alternatively deflecting the light of Kousek et al. and automatically leveling the device of Kousek et al..

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
